

Header Overview

This is a compiled guide to the data that can be extracted from the POS Databases. It discusses briefly each table's use and columns, as well as the uses and terms in those columns.

discount

Holds a record of all available discounts in POS.

Column	Use/Contents	Data Type
CODE	Discount Code in POS	String
DESC	Discount Name	String
TYPE	Discount Type. Either basing on Percentage or max Amount	String
VALUE	Numeric Value defining Discount. Bases off of Discount Type	Integer
POS	Pos Machine	String
BRANCH	Branch Code	String

rd1800

Holds a record of all product Departments

Column	Use/Contents	Data Type
DEP_CODE	Department Code in OS	String
DEPDESC	Deatment Name	String

Column	Use/Contents	Data Type
POS	Pos Machine	String
BRANCH	Branch Code	String

rd5000

Holds a record of all transactions per product purchased

Column	Use/Contents	Data Type
STORE_NUM	Store Number	String
TRANSDATE	Transaction Date	Date
INVOICE	Invoice Number	String
CAS_CODE	Cashier Code	String
ITE_CODE	Product Code	String
QUANTITY	Quantity of Product Purchased	Integer
UNT_PRIC	Price per Unit of Product	Integer
AMOUNT	Total Amount for Product	Double
DISCOUNT	Discount Amount Applied Discount	Double
SCHARGE	Service Charge	String
DT	Discount Type (Amount or Percentage)	String
DEP_CODE	Department Code for Product's Department	String
DATE	Date of Transaction	Date
TIME	Time of Transaction	Time
CUS_CODE	Customer Code, used for BDS	String

Column	Use/Contents	Data Type
TRN_CODE	Transaction Code	String
ORNUM	OR Number	String
TAG	Sale or Refund Flag	String
DISC_CODE	Discount Code applied to Product Sale	String
SRNO	ID Num for customer availing Discount	String
SRNAME	Name for customer availing Discount	String
TYPE	Dine-in Take-out or BDS	String

FREE	Free item Flag	String
INV_FLAG	-	String
REC_NO	-	String
LPAY_DISC	-	String
GC_EXCESS	GC Excess	Double
VAT_FLAG	VAT Flag	String
VATDIV	VAT Percentage	Double
BDL_CODE	-	String
VAT_AMNT	VAT Amount	Double
VAT_DISC	Amount of VAT Discount	Double
VAT_PRIC	VAT Price per Unit	Double

Column	Use/Contents	Data Type
TRANSNO	Transaction Number	String
POS	Pos Machine	String
BRANCH	Branch Code	String

rd5500

Holds a record of all Products

Column	Use/Contents	Data Type
INCODE	Product Code	String
ITE_DESC	Product Description	String
ECR_DESC	Display Description	String
DEP_CODE	Department Code of the Product	String
UNT_PRIC	Price per Unit	Double
UNIT	Unit type	String
TAXPRCNT1	Tax Percentage	Double
TAXAMOUNT1	Tax amount	Double
TAX1DIV	Tax Percentage from Amount	Double
POS	Pos Machine	String
BRANCH	Branch Code	String

rd5800

Holds a record of all monetary transaction

Column	Use/Contents	Data Type
STORE_NUM	Store Number	String
TRANSDATE	Transaction Date	Date
INVOICE	Invoice Number	String
CAS_CODE	Cashier Code	String
AMT_TENDER	Amount Tender	Double
CHANGE	Change	Double
NAME	Name of Customer	String
REF_NO	Reference Number of Transaction	String
DATE	Date	Date
TIME	Time	Time
TAG	Sale or Refund Flag	String
PAYCODE	Payment Code	String
TRN_CODE	Sale or Refund Code	String
REF_CODE	Reference Code	String
ORDERSLIP	Order Slip	String
REC_NO	-	String
CUSINFO1	Customer Information (Name)	String
CUSINFO2	Customer Information (Misc)	String
CUSINFO3	Customer Information (Card or ID Number)	String
TIN_TAG	CUSINFO3 Flag for TIN	String
TRANSNO	Transaction Number	String
POS	Pos Machine	String

Column	Use/Contents	Data Type
BRANCH	Branch Code	String

rd5900

Holds a record of all payment methods

Column	Use/Contents	Data Type
PAY_CODE	Payment Code	String
PAY_DESC	Payment Method Description	String
METHOD	POS System Internal Flag	String
MAX_AMOUNT	Maximum Amount applicable for Payment Method	Double
POS	Pos Machine	String
BRANCH	Branch Code	String
